Jl.Bandar Meriah , Suka Maju , Kec.Sunggal , Kab.Deli Serdang

Software Engineering student at Politeknik Negeri Medan with strong interest in backend development and application security. Experienced in Java and Spring Boot fundamentals, REST API concepts, and secure coding principles. Certified in Full Stack Java Programming and Application Security. Highly motivated to learn, detail-oriented, and ready to contribute as a software engineering intern.

Experiences

PT Sinergi Transformasi Digital Feb 2024 - Jun 2024

Software Engineering Intern (Independent Study Program)

- Participated in a Certified Independent Study program focused on Full Stack Java development
- Learned and applied backend development concepts using Java and Spring Boot
- Developed REST API features and implemented basic application logic
- Studied fundamental application security and clean coding practices

Education Level

Politeknik Negeri Medan - **Medan, Indonesia** Aug 2022 - Jun 2026 (Expected)

, 3.70/4.00

- Studied software engineering fundamentals including programming, databases, and system analysis
- Studied core informatics concepts including programming, data structures, databases, and software development fundamentals
- Learned system analysis, basic algorithms, and problem-solving techniques
- Applied software engineering principles in individual and group projects

Projects

Restaurant Management Web Application Aug 2024 - Nov 2024

Warkop Musafir Jaya

- Developed a web application to support restaurant operations
- Implemented menu management and customer order handling features
- Built web application features using Laravel 10
- Managed database operations for menu and order data

Learning Management System (LMS) Apr 2025 - Jun 2025

Academic Project

- Developed a web-based Learning Management System for academic use
- Implemented user authentication and course management features
- Built backend services using Java and Spring Boot
- Designed REST APIs and handled basic database operations

HR & Payroll Management System Feb 2026 - May 2026

Academic Project

- Developed a web-based system for employee and payroll management based on Indonesian PPh 21 regulations
- Implemented employee data management, attendance tracking, and monthly payroll calculation in compliance with PPh 21 rules

- Built backend payroll logic using Java and Spring Boot
- Applied validation and data consistency checks to ensure accurate tax and salary calculations

Other

- **Certifications** (2024): Certified Application Security Engineer (CASE)
- **Certifications** (2024): Certified Independent Study – Full Stack Java Programming
- **Skill**: Java, Springboot, Rest API, Javascript, Typescript, Next js, Laravel, Google Cloud, Git, Github. Problem Solving, Analytical Thinking, Fast Learner
