PROFESSIONAL SUMMARY

Software Engineering graduate of Politeknik Negeri Medan, specializing in backend development and application security. Experienced in designing REST APIs and building full-stack applications with Java and Spring Boot. Completed a software engineering internship at PT Rezeki Teknologi Indonesia. Certified by EC-Council (CASE, exam score of 92) and BNSP (Web Development).

EDUCATION

Politeknik Negeri Medan Aug 2022 – Jun 2026
Software Engineering *Medan, Indonesia*

- Coursework: programming, data structures, algorithms, databases, and system analysis

WORK EXPERIENCE

PT Rezeki Teknologi Indonesia Jan 2026 – Mar 2026
Software Engineer Intern *Medan, Indonesia*

- Developed multiple applications, including Telcom App, Walet, alatparkir marketplace, POS, and Ticketing System
- Handled database design, backend and frontend development, API integration, and bug fixing
- Supported installation and troubleshooting of IoT-based parking systems

PT Sinergi Transformasi Digital Feb 2024 – Jun 2024
Full Stack Java Programming – Studi Independen Bersertifikat (MSIB Batch 6) *Indonesia*

- Built full-stack web applications with Spring Boot, Thymeleaf, MySQL, HTML, CSS, and JavaScript
- Developed REST API features and implemented core application logic
- Worked in a team using Git and code reviews, strengthening debugging and problem-solving skills
- Practiced fundamental application security and clean coding standards

PROJECTS

AnemiScan
Undergraduate Thesis Project – Mobile Application *Flutter, Dart, CNN, REST API*

- Developed a mobile app for anemia detection from palpebral conjunctiva images, used by Puskesmas officers
- Trained a CNN model on the CP-AnemiC dataset with hyperparameter tuning, achieving 92% accuracy
- Implemented screening status tracking, lab result verification, and end-of-shift data synchronization

PLN ULP Medan Baru Visitor Registration
Web Application *Laravel, Blade, Tailwind CSS, MySQL*

- Developed a visit registration system for PLN ULP Medan Baru with online registration and status checking
- Built a structured registration and status-checking workflow for more organized visit tracking
- Source code: github.com/Rovineshutabarat/web-kunjungan-pln-medan-baru

Learning Management System (LMS) Apr 2025 – Jun 2025
Academic Project *Java, Spring Boot*

- Developed a web-based Learning Management System for academic use
- Implemented user authentication and course management features
- Designed REST APIs and handled database operations for backend services

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Dart
Frameworks	Spring Boot, Thymeleaf, Laravel, Next.js, Flutter, Tailwind CSS
Backend & Cloud	REST API, MySQL, Google Cloud
Tools	Git, GitHub
Core Strengths	Problem Solving, Analytical Thinking, Fast Learner

CERTIFICATIONS

2026	Web Development – Badan Nasional Sertifikasi Profesi (BNSP), valid until Jan 2029
2024	Certified Application Security Engineer (CASE) – EC-Council, valid until 2027
2024	Certified Independent Study, Full Stack Java Programming – PT Sinergi Transformasi Digital
